

Figure 3 | Human MCOP-CRC association and core stability

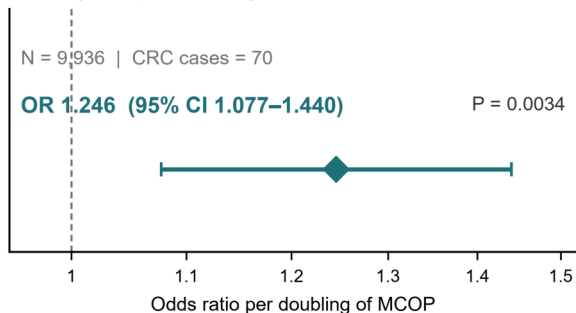

A

Primary complex-survey estimate

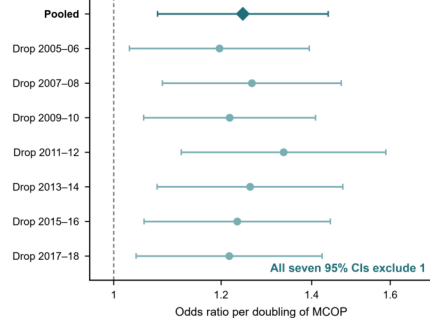

N = 9,936 | CRC cases = 70

OR 1.246 (95% CI 1.077–1.440)

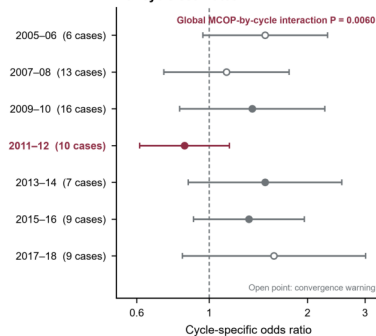

P = 0.0034

**B**

Leave-one-cycle-out stability

**C**

Per-cycle estimates

**D**

Independent complex-survey implementation

R survey::svyglm

OR 1.246

Python Taylor sandwich

OR 1.246

$|\Delta \log OR| < 10^{-12} \cdot N=9,936 \cdot CRC=70$
