

A**Paired PPAR/NR change across platforms**

Every point is one matched tumor-normal patient/donor

suppressed in tumor

**B****Epithelial dual-module state**

Census: 36 paired donors

**C****Cell-compartment specificity**Paired median Δ PPAR/NR; Wilcoxon signed-rank test**Epithelial** Δ -0.419

n=36 · P=4.3e-07

Endothelial Δ -0.019

n=33 · P=0.6088

Fibroblast Δ +0.172

n=31 · P=0.5043

Myeloid Δ +0.610

n=35 · P=8.0e-09

Opposite myeloid direction argues against a tissue-wide suppression signal.
